ValuePLUS Computer Systems

ValuePLUS Computer Systems (VPCS) started as an entrepreneurial venture in 2000. It was initiated to set high standard in its software development processes and quality assurance. The initial focus of this organization is to establish a strong presence in the local market whilst endeavoring in pursuit of export market.

Mission and Vision

Mission

To be an outstanding software company in the world ICT market, utilizing the local expertise, substantially contributing to the country economy.

Vision

ValuePLUS Computer Systems (VPCS) is working to achieve success in developing and selling software focusing on the Bangladesh market. We also want to achieve the following objectives during our endeavor in the software industry:

- Creating Human Resource that can earn foreign exchange
- Establishing industry standard in quality assurance
- Implementing state-of-the-art software development methodologies by ensuring proper documentations.
- Building a process-oriented software development team for developing high quality software.

The entrepreneurs

Three young entrepreneurs namely: Shihab Ahmad, Nahid Ahmad, and Nayeem Ahmad initiated VPCS with an intention to make a difference in the software industry of Bangladesh. Following is a brief background of the entrepreneurs:

Shihab Ahmad

- Graduated from BUET in 1995 from Electrical & Electronics with first class.
- Completed MBA from Lahore University of Management Sciences (LUMS) and placed on the Dean's Honor List.
- Earned a Gold Medal for excellent performance in Corporate Finance
- Has worked in IT industry since 1995.

Nahid Ahmad

- Graduated from Chittagong University in Forestry in 1998
- Completed MBA with Information Technology Management (ITM) concentration from LUMS as an Asian Development Bank Scholar.
- Has worked in IT industry for 4 years
- Worked as an MIS Specialist in IPDC Consulting, the consulting dimension of Industrial Promotion and Development Company (IPDC) of Bangladesh Limited.

Nayeem Ahmad

- Graduated from BUET in Computer Science and Engineering in 2002
- Has designed and developed software for 3 years

Our services and products

Information Technology Consulting

In non-IT business organizations, IT should play an enabling role. IT, with its enabling power, should facilitate the business operation by eliminating/reducing repetitive manual tasks and automating different business processes. Organizational IT implementation should consider several factors. Some of the key factors are:

1. Competition in the market place and IT status of the competitors,
2. Existing organizational structure and business process,
3. Financial status of the organization,
4. Future business plan, and
5. Requirements of IT at department level and scope of implementation

ValuePLUS Computer Systems, with its expert team of qualified professionals, offers technical expertise in:

1. Assessing your IT needs,
2. Identifying existing IT resources of the organization (People, processes, infrastructure),
3. Selecting the suitable technologies for your organization, and
4. Recommend the optimal IT solution for your organization

Our software products

VPCS focuses its software development efforts in areas where there is demand in the local market. The organization's main aim is to maintain high standard of Software Quality Management with a view to meeting the needs of the customer. We have already developed the following software.

School Management System 1.0

This software facilitates the school management to publish results of different examinations and to print progress reports. The software incorporates subject codes provided by the Board of Education and prepares reports based on that. During preparation of progress reports, the software considers rules and regulations of the Board (GPA, Fourth subject) etc to assign grades and to calculate total marks. The software generates Registration Information Form (RIF) which the school needs to submit to the Board every year. All reports can be printed in Bangla as per the requirement of a specific school.

The system also has other modules namely: Teacher Information System, Library Management System, Fee Management System, Accounting System and Admission Management System.

The software allows an organization or individual to backup critical data automatically. The software saves data of individual computers into a central location for back up and security. Thus, the software enables the management of an organization to implement a highly effective data security system.

BackupPLUS 2.0

Personnel Management Information System (PMIS)

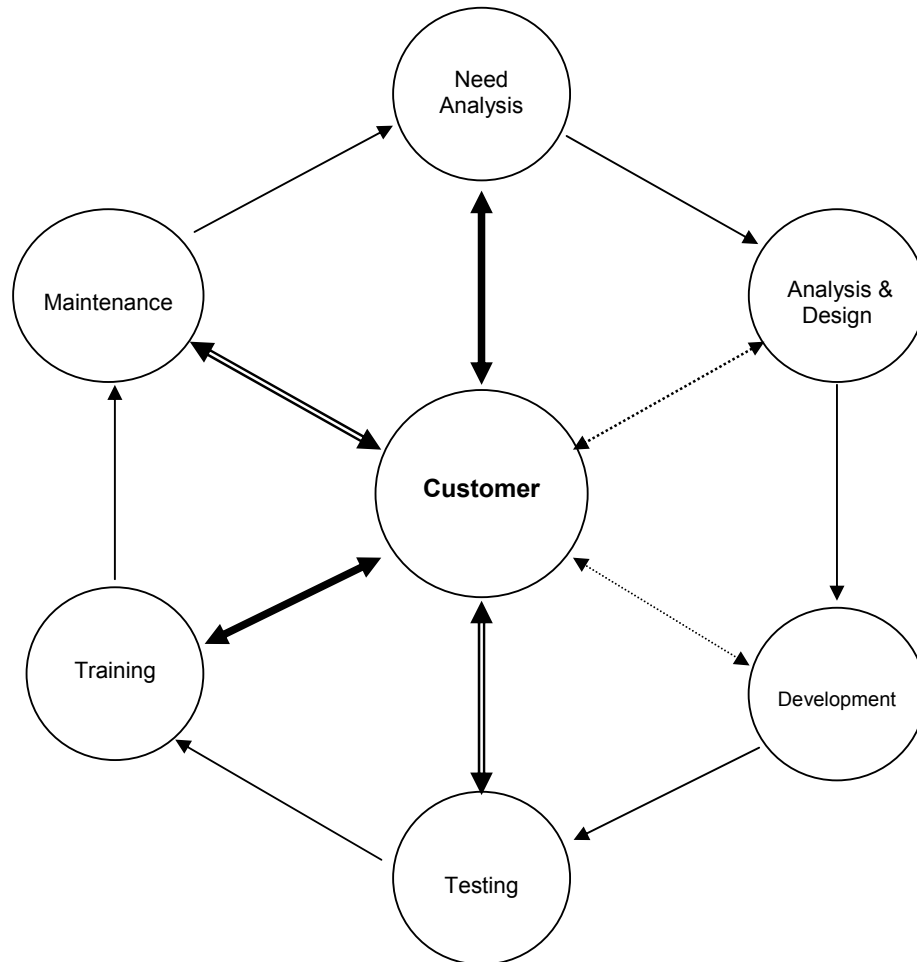

Any organization with large number of employees can use this software to store information about their employees. This software generates number of reports that may be needed by an organization. This also has a robust access control system to ensure that any person using the software can do only what he is authorized to do.

This software is very useful for any organization that needs to maintain its assets, especially machinery. This allows logbook maintenance spares purchase and issues, maintenance planning, schedule etc.

Maintenance Management System (MAMS)

Our Development Methodology

We follow a process oriented waterfall methodology for developing software for our clients. We highly emphasize on different documentation and quality assurance tools and techniques to assure highest level of quality for the software delivered to our valued customers. The following diagram shows different steps that we follow at VPCS.

Intensity of interaction with client institution

-  High
-  Medium
-  Normal

Our clients

We have delivered our services to the following institutions:

1. Rahimafrooz Batteries Ltd.
2. SURCH
3. Nasirabad Collegiate School
4. Siam Cooperative Society
5. Shampan shoes Ltd.
